

Hotel Calcformula The Angles

Down a dark lecture hallway, school
wind in my hair
Warm smell of Calculus, permeating the
air
Up ahead in the classroom, I saw them
figuring mass
My head grew weary and my brain knew
then
I had to stop for the class
There she stood at the lectern
I heard the school bell
And I was thinking to myself,
'Is this Room 7 or is this Room Hell'
Then she lit the projector and she
showed me the proof
There were voices in the lecture hall,
I thought I heard them spoof...

Welcome to the Hotel Calcformula
Such a brainy place (such a brainy
place)
Such a brainy place
Plenty of room at the Hotel Calcformula
Any school year (any school year), you
can learn it here

Her graph is definitely twisted, see how
it curves and bends
She got a lot of nerdy, nerdy boys, that
she calls friends
How they cram in the schoolyard, sweet
study sweat
Some cram and remember, some cram
and forget

So I asked my Professor,
'Why the tangent line'
And he said, 'We haven't seen Isaac
Newton here since sixteen sixty nine'
And still his theories are calling beyond
the grave,
Wake you up in the middle of the class
Just to hear them rave...

Welcome to the Hotel Calcformula
Such a brainy place (such a brainy
place)
Such a brainy place
They're provin' it up at the Hotel
Calcformula
Come to analyze (come to analyze),
there's no alibis

Vectors on the chalkboard,
I think my grade will dive
And she said 'You must all just
remember here, don't drink and derive'
And in the tutor's chambers,
They gathered for their quest
They cram it nearly all the night
But they just can't ace the test

Last thing I remember, I was
Searching for the door
I had to learn the topics back
In the class I took before
'Relax,' said the teacher,
We will learn to integrate.
You can withdraw any time you like,
but you won't graduate!

Mathematic Man

DesHartes

Crammed one night not long ago
My grade was not so strong you know
A tutor man came to me
Gonna help me review
You know I could not make an A
It seemed, a passing grade was just a dream
It seemed like he knew it
We got right to it, yeah
"Rise and run, girl" he said with a smile
"You don't have to learn it yet
Let's plot lines awhile
But try to comprehend
Try to comprehend
Try try try to comprehend
I'm a mathematic man."

Winter nights we solved 'til dawn
Soon I thought all hope was gone
I'll never be so clever
This class seems like forever
Spring semester turned to fall
Tried real hard to learn it all
Mama says she's worried
Graduate in a hurry, yeah
"Rise and run, girl" mama cried was a slope
"Too soon to give up maybe but my girl
is losing hope!"
"But try to comprehend, try to
comprehend
Try try try to comprehend
He's a mathematic man, mama, ah...
He's a mathematic man"

"Rise and run, girl" he said was a slope
"I cast my spell of math on you, a genius
from a dope!"
But try to comprehend, try to
comprehend, oh... oh....
Try try to comprehend
Try try try to comprehend
He's a mathematic man!"
Oh, he's got the lesson plan

"Rise and run, girl" he said with a smile
"You don't have to learn it yet
Let's plot lines awhile
But try to comprehend
Try to comprehend
Try try try to comprehend
I'm a mathematic man." yeah... oh...

I'm a Deriver Derivor

Rise and run
Domain and range
Did my time with my functions
Want the instantaneous rate of change
Just a man and his will to derive
You spent the time
You have all the tools
The chain, or quotient, or product
Don't lose your grip on the Calculus
rules
You must master them all to derive

You see, I'm a deriver
It's extrema we hunt
Risin' up to the challenge of our finals
'Til the last known deriver stalks his
critical point
I'll be watching it all because I'm a
deriver

Min to max
Valley to peak
Inflection
And concavity
They wrack our brains, still the
challenge we seek
For the thrill and the skill to derive...

You see, I'm a deriver
It's extrema we hunt
Risin' up to the challenge of our finals
'Til the last known deriver stalks his
critical point
I'll be watching it all because I'm a
deriver

Rise and run
Straight to the top
Had the smarts got the glory
Found the distance now I've got to go
plot
Just a man and his will to derive

You see, I'm a deriver
It's extrema we hunt
Risin' up to the challenge of our finals
'Til the last known deriver stalks his
critical point
I'll be watching it all because I'm a
deriver

See, I'm a deriver.....
See, I'm a deriver.....
See, I'm a deriver.....
See, I'm a deriver.....

Plus or Minus Two U Squared

See equations in your eyes,
See the one for sample size,
I'm within two.

Take a poll and estimate,
And it never fails she's within eight,
And I want within two.

Plus or minus two,
Plus or minus two.

Through the norm we sample more,
She gave her all, got within four,
And I want within two.

Plus or minus two,
Plus or minus two...ah, ah
I'm within
Plus or minus two.

And you solve your life away,
And you solve your life away,
And you solve,
And you solve,
And you solve your life away.

My brain is fried,
My mind confused, she's left me with
Something to learn and
Something left to prove.

And you solve your life away,
And you solve your life away,
And you solve,
And you solve,
And you solve your life away.

Plus or minus two,
Plus or minus two...ah, ah
I'm within
Plus or minus two.
Oh, oh, oh, oh...
Plus or minus two,
Plus or minus two...ah, ah
I'm within
Plus or minus two.
Plus or minus two.

Two...Two

What would you do if I filled a balloon
Could you calculate volume for me?
Measure the sphere and take radius cubed
Times four-thirds and that number near three
