

## **Math to the Bone**

### **George Thoronerd**

Well, on the day I was born, the  
teachers all gathered 'round  
And they gazed at the numbers, on the  
boy they had found  
The math nerd spoke up, said "He's one  
of our own!"  
He could tell right away, that I was math  
to the bone

Math to the bone  
Math to the bone  
M-M-M-M-M-Math  
M-M-M-M-M-Math  
M-M-M-M-M-Math  
Math to the bone

I filled a thousand brains, before I met  
you  
I'll fill a thousand more baby, before I  
am through  
I wanna be your teacher baby, help ya  
solve on your own  
'Til infinity honey, I'll be math to the  
bone

Math to the bone  
M-M-M-M-M-Math  
M-M-M-M-M-Math  
M-M-M-M-M-Math  
Math to the bone

I'll make a Psych major solve, I'll make  
an Art major graph  
I'll make a Lit major plot, and make a  
Chem major laugh  
I wanna be your teacher baby, help ya  
solve on your own  
'Til infinity honey, I'll be math to the  
bone

M-M-M-M-M-Math  
M-M-M-M-M-Math  
M-M-M-M-M-Math  
Math to the bone

When I start to teach, then the chalk  
dust will fly  
Every person I reach, will learn to  
simplify  
I wanna be your teacher baby, help ya  
solve on your own  
'Til infinity honey, I'll be math to the  
bone

Math to the bone  
M-M-M-M-M-Math  
M-M-M-M-M-Math  
M-M-M-M-M-Math  
Math to the bone

## **Ned Tangent**

### **Catch Math Fever**

Well, they don't know where it comes from  
But it always comes  
I hope they get it from me  
And they don't know how they'll get it  
But they sure get it good  
I know eventually

They're gonna catch math fever  
Catch math fever

Well, the first time that I got it  
I was in seventh grade  
I got it from my Algebra book  
I went to see the teacher and  
She taught me to factor  
I think that's when I was hooked

It made me catch math fever  
Catch math fever  
I got advanced math fever  
Catch math fever

It's nothin dangerous  
I feel no curse  
Delta is ch-ch-change  
You know you got it when you're always  
inverse  
I'm always multiptyin' ... plyin'  
Numbers in my head

Well, the calculator purrs with  
The stroke of my hand  
They know I got batteries  
They know just where to go  
When they need their number man  
They know I'd do it for free

I'll help ya catch math fever  
Catch math fever  
Can't help but catch math fever  
Catch math fever

Catch math fever  
Catch math fever  
Catch math fever  
Catch math fever  
Catch math fever  
Catch math fever

## **ToneDef Leppard**

### **Plotagraph**

I'm outta chalk, outta luck  
Gotta plotagraph, picture of  
Conic section, it's no stretch  
You're the only one I wanna sketch  
I see your curves every time I dream  
Concavity, max and min extremes  
Coordinates and vertices  
You're all I want, my symmetry

Oh, look what you've done to this  
math'matician  
Oh Oh, look what you've done

Plotagraph - I just want-ta  
Plotagraph - I just need-ta  
Plotagraph - All I want is to plotagraph  
I can't get enough

I'll be your grapher, if you dare  
A parabola, with a square  
Exponential, you grow wild  
You make every graph look like a child  
You got some rationality  
Your asymptotes to infinity  
Coordinates and vertices  
You're all I want, my symmetry

Oh, look what you've done to this  
math'matician  
Oh Oh, look what you've done  
I've gotta plot you

Plotagraph - I just want-ta  
Plotagraph - I just need-ta  
Plotagraph - All I want is to plotagraph  
You've gone straight to my brain

Oh, look what you've done to this  
math'matician  
Oh Oh, look what you've done  
I've gotta plot you

Plotagraph - I just want-ta  
Plotagraph - I just need-ta  
Plotagraph - All I want is to plotagraph  
I wanna sketch you

OOOOOOOOOOOO

## **Mathematical Girl**

### **Mathonna**

Some boys love art, some boys drama  
I think that's passe  
If they don't care about my bell curves  
I just walk away

Jocks can flex and they can pose  
But that won't float my boat  
'Cuz only guys who analyze  
Approach my asymptote, 'cause we are

Living in a math'matical world  
And I'm a mathematical girl  
You know that we are living in a  
math'matical world  
And I'm a mathematical girl

The boys who dance, just have no  
chance  
Of ringing my bells  
If they can't find my interest I com-  
pound with someone else

There are dopes who can't find slope  
They rise and run away  
I want boys who save their theorems  
For a brainy day, 'cause they are

Living in a math'matical world  
And I'm a mathematical girl  
You know that we are living in a  
math'matical world  
And I'm a mathematical girl

Living in a math'matical world  
(math'matical)  
Living in a math'matical world  
Living in a math'matical world  
(math'matical)  
Living in a math'matical world

If you're a guy who's a Stats book shy  
Of a total shelf  
You're not my math man, so you just  
can  
Go function yourself, 'cause everybody's

Living in a math'matical world  
And I'm a mathematical girl  
You know that we are living in a  
math'matical world  
And I'm a mathematical girl

A math'matical, a math'matical, a  
math'matical, a math'matical world

Living in a math'matical world  
(math'matical)  
Living in a math'matical world

## **You Dork, You Dork Old Four Eyes**

Start gettin' the clues, I'm nerdy today  
I want to make a name of it - You Dork,  
You Dork  
These white wing-tip shoes, will give me  
away  
Right now I'm not ashamed of it - You  
Dork, You Dork

No need to work up any pity, cuz I'm a  
geek  
You'll find I'm king of the dull, top of the  
dweebs

These cool attitudes, are melting away  
I'll take a stand for who I am - as old  
You Dork  
I'll wear high-water pants, each time I  
get the chance  
I am to you - You Dork, You Dork

You Dork, You Dork  
No need to work up any pity, cuz I'm a  
geek  
Cuz I'm a statistician, algebraist,  
Calculus fan, a number man.

These middle ground blues, are melting  
away  
I'm gonna deviate far from the mean -  
as old You Dork  
And.... No matter when or where, I'm  
gonna make a perfect square  
The proud the few - You Dork, You Dork  
You Dork....

## Say that funky number, Math Guy Weird Cherry

Hey, prove it now...  
Yeah, hey

Yeah, I was a funky teacher  
Teachin' trigonometry class  
And provin' all the theorems (yea)  
And learnin' 'bout Pythagoras

With unit circles 'round me,  
Degrees just had me feelin' so low,  
So I converted quickly (yes I did)  
And worked 'em out in radian mode

Yeah, there were tangents and secants  
and groovin' to the provin'  
And just then digits we already learned  
about they shouted  
Say that funky number, Math Guy  
3.14159  
Say that funky number, Math Guy  
Lay down that theory and say that funky  
number 'til you die  
Number Pi...oh, 'til you die

<GUITAR SOLO>

Now at first it wasn't easy  
Angles, radians, cosines  
The folks were gettin' queasy  
I thought I'd have to go back to lines  
But now it's so much better (it's so much  
better)  
They're trigg'in' out in every way  
I'll never lose that feelin' (you know I  
won't)  
Of how I taught that lesson that day

When there were tangents and secants  
and groovin' to the provin'  
And just then digits we already learned  
about they shouted  
Say that funky number, Math Guy  
Say that funky number Pi  
Say that funky number, Math Guy  
Lay down that theory and say that funky  
number 'til you die  
Number Pi...oh, 'til you die

They shouted say that funky number  
(Say that funky number)  
Say that funky number  
(That irrational non-terminating number)  
Say that funky number  
(Say that funky number)  
Say that funky number  
(That number that goes on forever)

## **Pi Lombardo Orchestra**

### **Auld Lang Pi**

Should auld circumference be forgot  
remember radii  
Should auld circumference be forgot  
Diameter times pi  
Three point one four one five nine two,  
Six five three five eight nine,  
Seven nine three eternally,  
Our auld friend pi.

Should auld circumference be forgot  
remember radii  
Should auld circumference be forgot  
Diameter times pi  
Three point one four one five nine two,  
Six five three five eight nine,  
Seven nine three eternally,  
Our auld friend pi.
