

Old Time Radical

Job Seker and the Solver Bullet Band

Just take those old math books off the shelf
I'll sit and solve equations by myself
The other subjects ain't got the same soul
I like that old time radical

Don't try to take me to an art class
I'd rather integrate and calculate mass
The other courses ain't got the same pull
I like that old time radical

Still like that old time radical
Fractional powers just soothe my soul
I never miss out on irrationals
And that old time radical

I won't never use no English
I'd rather integrate a shell or a disk
There's only one sure way to get me to roll
Start using old time radicals

Call me numeric, call me what you will
Say that I'm complex, say I'll never be real
The other subjects ain't got the same soul
I like that old time radical

Still like that old time radical
Rationalizing just soothes my soul
I reminisce about my old slide rule
And that old time radical

Still like that old time radical
Using a square root just soothes my soul
My abacus would figure multiples
And that old time radical

Still like that old time radical
Simplification just soothes my soul
I never miss out on irrationals
And that old time radical

Still like that old time radical
That kind of index just soothes my soul
I reminisce about my old slide rule
And that old time radical

Still like that old time radical
That kind of symbol just soothes my soul
My abacus would figure multiples
And that old time radical

(I Can't Get Those) Sadist Fractions

The Rolling Cones

I can't get those sadist fractions
I can't get those sadist fractions
'Cause I try and I try and I try and I try
I can't get those, I can't get those

When I'm sittin' at my desk
And that man stands at the podium
He's makin' me snore and snore
About some rationalization
And some order of operations
I can't get those, oh no no no
Ra-a-aise, that's what I say

I can't get those sadist fractions
I can't get those sadist fractions
'Cause I try and I try and I try and I try
I can't get those, I can't get those

When I'm tryin' to divide
And my brain feels like it's been fried
From trying to know why
And it's all such a mess, cause it's just a
guess
To invert and multiply
I can't get those, oh no no no
Ra-a-aise, that's what I say

I can't get those sadist fractions
I can't get those hard subtractions
'Cause I try and I try and I try and I try
I can't get those, I can't get those

Now I'm takin' on the mission
To master rational addition
And I'm workin' on division
I have become a big hater of
denominators
So I'll put them off until later
I can't get those, oh no no no
Ra-a-aise, that's what I say

I can't get those, I can't get those
I can't get those sadist fractions
Those sadist fractions, those sadist
fractions, those sadist fractions

Sweet Equation

Aeromath

Sweet Equation

Sweet Equation

Lookin' for answers that come in pairs
Try factoring or complete the square
If ya need solutions, and ya need 'em
quick
There's a formula for a quadratic

Graph some big mama with a steep
tangent
Said they get up and grow with an
exponent
Well I got good news, cause you're
gettin' warm
Just convert it into logarithmic form

Sweet Equation

Sweet Equation

I pull into school in my beat-up car
Learn how to solve with absolute value
bars
I had a ratio, so I multiplied
Well, it cleared things up cause the
fraction done died (yes it did)

Isolatin' one variable
Won't always give an answer that's
numerical
That's the fun thing about doin' algebra
Your solution might be a brand new
formula

Statistition

Stevie Blunder

Very statistitious, bell curve on the wall,
Very statistitious, so empirical,
Normal distribution, centered 'round the
mean
Standard deviations, most fall within
three

When they deceive with things that you
don't understand
Distort the numbers
Statistitions lie all day

Very statistitious, probability
Mind your p's and q's, they're
complementary
Median or mean, central tendency
Make a distribution, show the frequency

So you'll believe in things that you don't
understand
They twist the numbers
Statistitions fabricate

(Scream) MUUUUUUUUUUUUUUU...

Very statistitious, show significance
With an estimation, know your
confidence
Gettin' inferential, hypothesis test
Linear regression, the line that fits the
best

When they deceive with things that you
don't understand
Invent the numbers
Statistitions know the way

To all the Curves we've Graphed Before

Julio Igradius with Willie Nullset

To all the curves I've graphed before
I've dabbled with on my chalkboard
For circles and for lines
I dedicate these rhymes
To all the curves I've graphed before

To all the curves I once professed
And may I say I've taught the best
For helping me to learn
My heart will always yearn
For all the curves I've graphed before

The rates of change shrinking and
growing
Derivatives will help us see
The rates of change continue showing
Extrema and concavity

To all the curves who shared my days
Who now are someone else's craze
I thank Rene Descartes
From deep inside my heart
For all the curves I've graphed before

To all the curves with symmetry
Who filled my nights with ecstasy
They live within my brain
And on the xy plane
Are all the curves I've graphed before

The rates of change shrinking and
growing
Derivatives will help us see
The rates of change continue showing
Extrema and concavity

To all the curves we've graphed before
On our graphing calculator
To parabolas we croon
We dedicate this tune
To all the curves we've graphed before

To all the curves we've graphed before
We've sketched out on our graph paper
We know the line is long
To dedicate this song
To all the curves we've graphed before

Freethird

Lynyrd Mathnyrd

If I teach how to borrow
Would you subtract properly?
For I must be movin' on now
'Cause there's too many chapters I've
got to teach.
If I divided by zero
Things just wouldn't calculate
'Cause I'm as free as a third now
And this third won't terminate (no no no
no no)
And this third won't terminate
And this third won't terminate
It won't terminate

Bye, bye, babe, it's been a sweet class
(yea)
Though my grading I can't change
But D's won't bring graduation
'Cause skippin' class is to blame
If I divided by zero
Things just wouldn't calculate
'Cause I'm as free as a third now
And this third won't terminate (no no no
no no)
And this third won't terminate
And this third won't terminate
It won't terminate
It repeats, it won't terminate
Oh ... it's too late
Won't you divide ... a free third, yea

ACCC

The Village Idiots

Student, there's no need to feel sad
I said, student, 'cause your job drives
you mad

I said, student, it's a time to be glad
There's no need to be unhappy
Student, there's a place you can go
I said, student, when you're short on
your dough
You can go there, and I'm sure you will
find
Many ways to improve your mind

It's fun to study at ACCC
It's fun to study at ACCC

They have teachers who care, and the
staff is so nice
It's a great deal for half the price

ACCC
It's fun to study at ACCC

You can have a small class
Where you get a good look
And your fee will include the book

Student, are you listening to me
I said, student, what do you want to be
I said, student, you can make real your
dreams
but you've got to know this one thing
No one, does it all by themself
I said, student, go on down there for
help
And just go there, to the ACCC
They can lead you where you should be

It's fun to study at ACCC
It's fun to study at ACCC

It's a place you can go
Where they'll strengthen your brain
And the people will know your name

ACCC
It's fun to study at ACCC

You can get advising
when you need to enroll
and it's much more affordable

Student, I was once a big fool
I saw no point ever going to school
I felt, no one cared if I ever passed
I just felt like I would not last
someone saw me acting so lame
and said student go down to Burlingame
There's a place there called the ACCC
They can lead you where you should be

It's fun to study at ACCC
It's fun to study at ACCC

Classes are small enough
that you'll never feel lost
Did I ever mention the cost?

ACCC
It's fun to study at ACCC

ACCC
It's fun to study at ACCC
